

Blockly Programming Dataset

Tomáš Effenberger

CSEDM 2019

Block-Based Programming

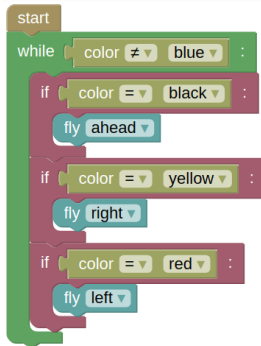

- freely available online game
- description of system behavior and data collection
- open source code
- broad range of difficulties
- 85 tasks

- 1.4 million program snapshots (edit / execution)
- 85 000 task session (student-task pairs)
- 85 tasks
- 5 800 students

Dataset Documentation

<https://github.com/adaptive-learning/adaptive-learning-research/tree/master/data/robomission-2019-02-09>

Grid World and Code Representation

setting.fields:

b	b	b	b	b
kA	kA	k	k	k
k	y	kA	kA	k
k	k	r	kA	kA
kA	kA	kA	r	k
k	k	y	k	k
k	k	kS	k	k

solution:

W!b{Ik{f}Iy{r}Id{l}}

Usage Example: Exploring State Space Graphs

Usage Examples

- exploring state space graphs
- measuring similarity of programming tasks
- measuring performance on programming tasks
- measuring difficulty of programming tasks

Summary

- 1.4 million program snapshots, 85 tasks
- comprehensive data documentation
- freely available online game
- description of system behavior and data collection
- open source code
