

problem

Write a function that returns True if a person is under 18 and drinks beer.

initial code:

```
def impose_fine(age, beer):  
    return False
```

author's solution:

```
def impose_fine(age, beer):  
    return age < 18 and beer
```

attempt

time: 154 sec
actions: 1 submit
code length: 5 lines

student's solution:

```
def impose_fine(age, beer):  
    if age < 18 and beer:  
        return True  
    else:  
        return False
```
